

## Project Profile: Great Wolf Resorts, Inc.

Great Wolf Resorts, Inc. is North America's largest family of indoor waterpark resorts. The resort's features include: lazy rivers, slides, whirlpools, zero-depth entry kiddie pools, massive water bucket dumps, wave pools, bowl rides and many other guest-activated water effects.

Great Wolf Resorts continues to celebrate its distinction as the first and only national hotel chain to have all properties achieve the Green Seal Certification - Silver for the lodging portion of its 10 Great Wolf Lodge brand resorts. After implementing energy-saving business practices, the company reports a reduced water usage which resulted in an overall savings of nearly 4.5 million gallons in 2009.

Neptune-Benson is proud to be the water filtration choice for the Great Wolf Resorts Inc., providing our Defender filters to over 15 North American locations.

*"Great Wolf Resorts is committed to protecting the environment by managing our natural resources. Defender filters have helped us in that commitment, by significantly reducing water consumption. We strive to provide a healthy environment for our guests and are proud to have Neptune-Benson as one of our partners in this endeavor."*
